PERSONAL PROJECTS

OzCar   CakePHP
- OzCar is a car agency website. It helps users to search for their desired car. The user can sell/buy a car online via easy applications and payment integration. There are many other features that serve those interested in cars

Big Red Packaging   CakePHP
- BRP is an e-commerce website that sell packaging materials. The users can easily buy the products online, use vouchers and track orders

Zofaria   Laravel
- Create site analysis
- Create database and relationships between tables
- Create a front-end and install it on Laravel
- The site is similar to Amazon and Jumia, but it only sells oils
- Using git, Ajax, javaScript, HTML, CSS, and Laravel
- There is a Dashboard for admin to control the site

eCommerce System   Laravel
- Develop a comprehensive e-commerce system by Laravel that efficiently manages product categories, individual products, shop products, and customer orders. The system should provide a user-friendly interface for both administrators and customers, facilitating seamless navigation and transaction processing.

Almushayqah law office   Laravel
- Create site analysis
- Create database and relationships between tables
- Create a front-end and install it on Laravel
- Using git, Ajax, javaScript, HTML, CSS,bootstrap and Laravel

Imam Academy   WordPress
- Create a comprehensive WordPress website as an educational platform for Quran and Arabic language courses.
- Implement on-page SEO strategies to improve the website's visibility on search engines, making it easily discoverable by the target audience.
- Connect social media accounts to the website, facilitating easy sharing of content and fostering community engagement.
- Implement best security practices to protect user data and sensitive information and ensure a secure browsing experience.
- Optimize the website's performance for faster loading times and a smoother user experience.
